“AI - POWERED CUSTOMER SENTIMENT ANALYSIS FOR E - COMMERCE”

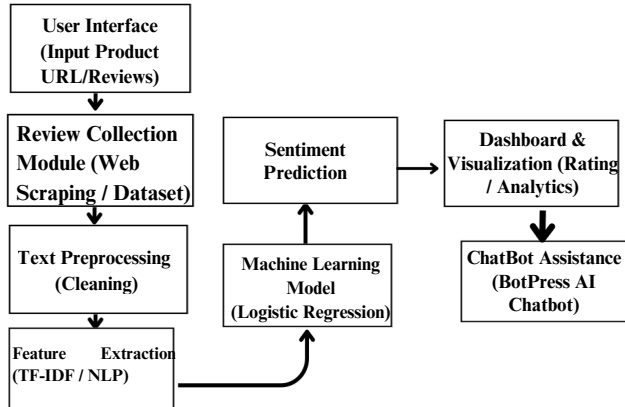

Name of Student's : 1. Suhani Londhe 2. Saloni Navgire 3. Amruta Patil 4. Shejal Waghmare

Name of the Guide : Mr. H. U. Joshi

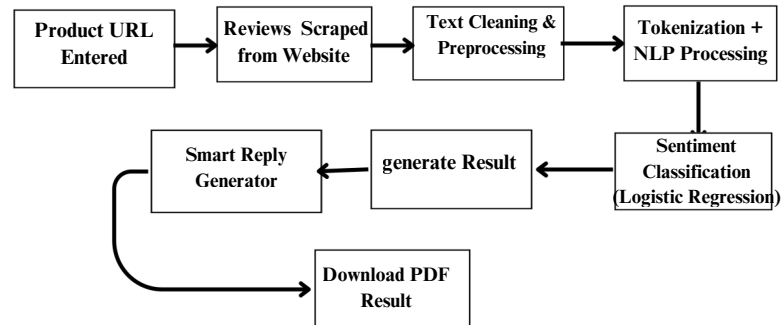

Academic Year : 2025- 2026

Introduction: E-commerce platforms generate a huge amount of customer reviews daily. Understanding customer opinions manually is difficult and time-consuming. The proposed AI-Powered Customer Sentiment Analysis system automatically collects customer reviews and classifies them into positive, negative, and neutral sentiments using Artificial Intelligence and Natural Language Processing (NLP). The system provides real-time sentiment analysis, visual dashboards, ratings, and chatbot assistance for better decision-making.

System Architecture:

Methodology:

Conclusion: The project demonstrates the effective use of Artificial Intelligence and Natural Language Processing for customer review analysis. The system automates sentiment prediction and provides accurate classification of customer opinions. Real-time dashboards, ratings, and chatbot support improve user experience and help users make better decisions.
